Krytox™ TM7 Grease

THE "STAY-PUT" LUBRICANT

Chemour Performance Lubricants

Extreme conditions. Extreme performance.

The "Stay-Put" Lubricant

Chemour Krytox™ TM-7 grease is specifically designed for the lubrication of segmented molds, both electrically and steam-heated. This lubricant eliminates carbon residue buildup on the molds associated with hydrocarbon and hydrocarbon-based synthetic greases. It exhibits excellent adhesion and will not bleed out to the parting line due to high heat tolerance, allowing the operator to significantly increase production by extending lubrication intervals.

Krytox™ TM-7 is a fluorinated grease with polytetrafluorethylene (PTFE) thickeners and selected additives. It has excellent thermal stability and load-carrying abilities. TM-7 has a high degree of chemical inertness and extremely high hydrolytic stability. Contact with boiling water or steam has no effect on this product, it will stay in the location it was applied, providing the best lubrication possible.

PART NUMBER	DESCRIPTION
TM7TUBE20Z	TM-7 KRYTOX GREASE 20ZTUBE
TM7TUBE80Z	TM-7 KRYTOX GREASE 80ZTUBE
TM7JAR1KG	TM-7 KRYTOX GREASE 1KG JAR

TYPICAL PROPERTIES OF Chemour Krytox™ TM-7

Standard NLGI Penetration Grade	#2
Estimation Useful Temperature Range	-20 to 290 (-4 to 555)
Pour Point, °C (°F)	-25 (-13)
Base Oil Viscosity, cSt 20 °C (68 °F) 40 °C (104 °F) 100 °C (212 °F)	1,715 500 46
Oil Volatility, % in 22 hr, 260 °C (500 °F), D972 modified	<1
Appearance	White, creamy consistency
Specific Gravity	2.0

Krytox™ TS4 Thread Sealant

THE SOLUTION FOR DEMANDING APPLICATIONS

Chemour Performance Lubricants Extreme conditions. Extreme performance.

Krytox™ TS4 thread sealant, the solution for demanding applications, is designed for use on a variety of metal and plastic surfaces.

Specialty formulated for added sealing power, TS4 seals water, air, steam, natural gas and reactive gasses and liquid.

- Can be re-applied over existing Krytox sealant.
- Clings to threads, will not shred or tear on assembly/disassembly
- Cannot plug or restrict critical piping, valves or instruments like tape solids
- Non-reactive, non-toxic, nonflammable, non-corrosive and compatible with most seal, O-ring and valve polymers
- Operating temperature range of -54 to 149°C (-65 to 300°F)
- Can be used in contact with Ethylene Glycol and many other chemicals
